Brian Leithead

I am a dynamic IT Consultant with extensive experience in developing and optimizing complex software solutions across various platforms including Dynamics and Odoo. Specializing in JavaScript, Python, and SQL Server, I excel at driving project efficiencies and significantly enhancing operational processes. My expertise also extends to front-end development, where I leverage my skills to improve user engagement and website functionality. Committed to mentoring and leading by example, I foster a collaborative team environment and encourage continuous improvement. As a strategic thinker and problem solver, I am dedicated to leveraging technology to meet and exceed business objectives.

WORK EXPERIENCE

IT Consultant
Traction Consulting Group
08/2023 - Present   *Wixom, MI*

Achievements/Tasks
- Managing project scope, timelines, and financials meticulously to guarantee project success and maximize client investments.
- Developing robust applications using Dynamics and Odoo platforms, leveraging technologies like JavaScript, C#, SQL Server, and Python to meet client requirements.
- Accelerating project delivery and issue resolution, consistently halving expected timeframes to enhance client satisfaction.
- Optimizing business processes through strategic automation, significantly increasing operational efficiency and reducing manual labor.
- Executing comprehensive testing and quality control measures to maintain superior software performance and dependability.

Front End Web Developer
Cops Plus
04/2023 - 08/2023   *Shelby Township, MI*

Achievements/Tasks
- Reduced development costs by 90% through advocating for in-house development strategies, leading to promotion shortly after completing a bootcamp.
- Developed e-commerce themes utilizing JavaScript, CSS, HTML, Python, and NodeJS to enhance website functionality and user engagement.
- Collaborated with the marketing team to design and implement a high-impact Daily Deals page that significantly increased daily visitor traffic.
- Implemented SEO practices to improve page ranking and visibility in search engine result.
- Integrated API connections to streamline data flow and enhance real-time content updates on the website.

Data Specialist
Cops Plus
05/2022 - 04/2023   *Shelby Township, MI*

Achievements/Tasks
- Cleaned and analyzed vast amounts of e-commerce data using Excel and Big Query to support strategic business decisions.
- Identified key performance indicators (KPIs) for top-selling products on Amazon and company's website, enhancing targeted marketing efforts.
- Supervised and trained a team of two Data Specialists, fostering a collaborative environment and improving team productivity.
- Developed customized data models and dashboards that provided actionable insights into customer behavior and sales trends.
